IDENTIFIERS	*Minnesota; Reverse Transfer Students

ABSTRACT

A series of data tables illustrates the 1980-81 movement of undergraduates among Minnesota's postsecondary institutions and educational systems (i.e., its state university system, community colleges, area vocational-technical institutes, the University of Minnesota, proprietary schools, and private two- and four-year colleges), as well as movement between other states and Minnesota. Statistics are provided for system-to-system transfers for 1979-80 and 1980-81; system-to-institution transfers; institution-to-system transfers; and system-to-system transfers by sex and class level. An introductory section highlights findings, including the following: (1) the total number of 1980-81 transfers was 26,690, a 13% increase over 1979-80; (2) women made up 51.8% of new undergraduate transfers and constituted 50.2% of all undergraduates; (3) vocational students accounted for 25% of all undergraduate transfers; (4) the number of transfer students admitted increased in the public systems and decreased in the private two- and four-year colleges from 1979-80 to 1980-81; (5) among intrastate transfers, more students entered and left the community college system than any other system; (6) of the transfers to community colleges, 24% had attended the University of Minnesota and 23% another community college; (7) of the transfers from community colleges, 31% entered a public state university and 26% entered the University of Minnesota; and (8) 20.9% of the transfer students came from out of state. INTRODUCTION

Transfer students make up approximately 25 percent of the students entering post-secondary institutions each year. This report describes the movement of undergraduates among the state's institutions and systems of post-secondary education. While each institution knows where its new transfer enrollees came from, it may not know how many of its out-going transfers have enrolled in other post-secondary institutions. Data collected at the state level can provide this information which is valuable for institutional enrollment and retention analysis.

Information presented in this report was obtained from the Coordinating Board's annual "Enrollment Survey of Transfer Students at the End of the Academic Year." It includes transfer students admitted to collegiate institutions during the academic year 1980-81. For vocational schools data are for Fiscal Year 1981. Each institution reported the number of transfer students admitted by school of origin, sex, and level of instruction.

Undergraduate Transfers from Systems to Systems displays transfer activity from one post-secondary system to another within the state and from all out-of-state institutions to Minnesota systems.

Undergraduate Transfers from Systems to Institutions shows the source, by system and out-of-state, of transfers students admitted to each post-secondary institution.

Transfer students' destinations, by system, are shown for each Minnesota post-secondary institution in the Undergraduate Transfers from Institutions to Systems table.

The last set of tables describes System to System Transfers by Sex and Class Level.

Student level was estimated for Normandale Community College and for out-of-state transfers at the University of Minnesota. Sex of students was estimated for Itasca Community College. For Willmar Community College, unclassified students appear as juniors.

Data on University of Minnesota enrollment of students who previously attended area vocational-technical institutes were unavailable.

Data from Hamline University were not available at the time of this report.

Students who transferred from Minnesota institutions to other states are not included in this report.

For detailed transfer information on individual institutions, contact the Manager of Information Services, Minnesota Higher Education Coordinating Board.

HIGHLIGHTS

1. The number of undergraduate transfer students in Minnesota post-secondary institutions totalled 26,690 in academic year 1980-81, an increase of 13 percent over the 23,614 transfer students who enrolled in 1979-80.

2. In academic year 1980-81, 18,943 undergraduate students transferred from one Minnesota institutions to another, while 7,747 students transferred from out-of-state schools to Minnesota institutions.

3. Women made up 51.8 percent of all new undergraduate transfers. In fall 1980, 50.2 percent of all undergraduates were women.

4. Vocational students accounted for 25 percent of all undergraduate transfers among Minnesota institutions. Transfers at the freshman level made up 28 percent of all transfers; sophomores, 27 percent; juniors, 15 percent; and seniors, 5 percent.

5. The number of transfer students admitted increased in all public systems from 1979-80 to 1980-81 and decreased in the private two-year and private four-year colleges.

6. Among intrastate transfers, more students both entered and left the Community College System than any other system. Of the 5,849 students who transferred from community colleges, 31 percent entered a public state university, 26 percent entered the University of Minnesota, 23 percent entered another community college, and 15 percent enrolled in area vocational-technical institutes. Of the 4,526 intrastate transfers who entered community colleges, 24 percent had attended the University of Minnesota, 23 percent another community college, 21 percent a state university and 18 percent an area vocational-technical institute.

7. Each four-year collegiate system enrolled more undergraduate transfers from public community colleges than from any other system.

8. Of all the transfer students who left private four-year colleges to attend another Minnesota institution, more (35 percent) enrolled in the University of Minnesota than in any other system.
